ITC wins Wills domain name

Monica Behura
NEW DELHI

ITC Ltd has won the case against a cybersquatter who had registered the domain name of its flagship brand Wills under www.wills.in. Under the provisions of the .IN Domain Name Dispute Resolution Policy (INDRP), ITC alleged and proved that the domain name registered by UK-based cybersquatter Mark Segal of Namegiant.com, was identical to its trademark and misleading as to its origin.

Says Rodney D Ryder, partner and head of the technology practice at law firm Kochhar & Co, which represented the Kolkata-head-quartered company, "The domain name is the virtual address of a company, a web mark so to speak. Allowing this domain name registration would be harmful to the ITC/Wills brand as this could also have serious consequences for the company under the Amended Information Technology Act of 2000." Under the provisions of this act, if a corporate body does not take reasonable security measures to safeguard its data, it could be held liable for any lapse in its data security. The company will be liable to pay compensation up to Rs 5 crore to the parties who has been caused wrongful loss due to deficiency in the security measures adopted by the company.

Registrations under the .in domain have been open since February 2005. Till now, 5 lakh Indian top level domain name extensions have been registered. It is expected in 2 years to cross to 10 lakh registrations. There have been 79 domain name dis- putes been resolved so far by through The National Internet Exchange of India (NKI) under the INDRP. Under the Trademarks Act and the Indian Arbitration & Conciliation Act of 1996 cyber-squatting disputes are required to be resolved within 45 days up to two months. Till "All commercial laws should be incorporated under this law," says Ryder, who had represented ITC in an cyber squatting case ...

NEW DOMAIN
